Summary

AI/ML Engineer with a strong foundation in Machine Learning, Deep Learning, NLP, Computer Vision, Data Analytics, and Generative AI. Proficient in Python, SQL, Scikit-learn, TensorFlow, Flask, FastAPI, LangChain, and Hugging Face, with hands-on experience in developing end-to-end AI applications, LLM-powered solutions, and deploying machine learning models. Passionate about solving real-world problems through scalable, data-driven, and intelligent AI systems.

Skills

Programming Languages: Python, SQL

Machine Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Model Deployment, Ensemble Learning

Generative AI & LLMs: Generative AI, Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), Vector Databases, AI Agents, Fine-Tuning, Embeddings, Semantic Search, LangChain, FAISS, Hugging Face Transformers

AI Technologies: Deep Learning, Natural Language Processing (NLP), Computer Vision, Predictive Analytics, Speech Recognition

Libraries/Frameworks: Scikit-learn, TensorFlow, PyTorch, Keras, Pandas, NumPy, OpenCV, Transformers, MediaPipe, Flask, FastAPI, Streamlit

Data Analysis: EDA, Data Cleaning, Statistics, Probability, Data Visualization, Data Preprocessing

Deployment & Tools: Flask, FastAPI, Streamlit, Git, GitHub, Jupyter Notebook, VS Code, Docker

Visualization: Power BI, Tableau, Matplotlib, Seaborn

Projects

HireLens AI – AI ATS Resume Screening Platform Developed an AI-powered ATS resume screening web application that automates candidate evaluation and shortlisting for recruiters. Built a resume processing pipeline to parse PDF, DOCX, and image resumes, extract candidate details, and compute ATS scores using TF-IDF similarity, skill matching, and experience-based ranking. Implemented recruiter authentication, job screening history, top-candidate shortlisting, and CSV/Excel report export to streamline hiring workflows.

Tech Stack: Python, Flask, SQLite, Scikit-learn, spaCy, Pandas, PyMuPDF, Tesseract OCR

Evaluation: Resume Parsing Accuracy: 92% | Candidate Information Extraction: 94% | Screening Time Reduced: 80%

Nova AI Chatbot with Multi-LLM Integration Developed an advanced AI chatbot supporting multiple Large Language Models through a unified conversational interface. Implemented contextual conversation memory, prompt management, real-time inference, and dynamic model selection. Designed an interactive web application to provide fast and seamless AI-powered conversations.

Tech Stack: Python, Streamlit, Flask, LangChain, Hugging Face Transformers, LLMs

Evaluation: Successful Response Rate: 95% | Average Response Time: <2 sec | Context Preservation: 93%

Face Mask Detection System Developed a deep learning-based face mask detection system using a Kaggle dataset to classify images into *Mask* and *No Mask* categories. Performed image preprocessing, augmentation, CNN model training, and validation to improve generalization. Integrated OpenCV for real-time webcam-based face detection and prediction.

Tech Stack: Python, TensorFlow, Keras, OpenCV, NumPy, CNN

Evaluation: Accuracy: 97.4% | Precision: 97.1% | Recall: 96.9% | F1-Score: 97.0%

Pune House Price Prediction using Linear Regression Built a machine learning model to predict residential property prices in Pune using Linear Regression. Performed data preprocessing, exploratory data analysis, feature engineering, model training, and evaluation. Visualized pricing trends and generated predictive insights using statistical analysis.

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Linear Regression

Evaluation: R^2 Score: 91% | Explained Variance: 91% | Mean Absolute Percentage Error (MAPE): 8.4%

Education

Bharati Vidyapeeth College of Engineering, Kolhapur
B.Tech in Computer Science (AI & ML)

2021 – 2025
CGPA: 6.72/10

Rajarambapu Institute of Technology (RIT), Islampur
Diploma in Mechanical Engineering

2018 – 2021
Percentage: 76.87%
